

BRASS Policy

At BRASS, our Senior Management Team and all its subsidiaries are strongly committed to executing its projects, services, and the development of new technologies with the highest standards of quality, respect for the environment, and utmost concern for human safety.

- Our primary objective is to always seek and confirm compliance with legal, regulatory, and voluntary requirements, as well as support our stakeholders in their needs and expectations.
- We strive to provide the safest and healthiest working conditions to prevent injury and deterioration of the health and well-being of our collaborators while seeking the elimination of dangers and threats, and the reduction of risks.
- We act transparently and responsibly to maintain open channels for consultation, participation, and feedback from our interest groups and, in particular, our collaborators.
- We identify and control all environmental aspects relevant to the organization and its operation, to prevent environmental risks and threats, while proactively promoting the protection of the environment through our work efforts.

This policy is a central part of our business strategy where the general and specific objectives, together with the activities established for continuous improvement, are designed from values that promote: honesty, excellence, and reliability.

Brad Ricks
